About Skydrops

Skydrops is the only Qatar-based Atmospheric Water Generation plant with the regulatory approvals required to operate in the GCC.

Skydrops was purpose-built to align with the **sustainability** agenda of the **Qatar National Vision 2030**

We craft ultra-pure drinking water from humidity

We package it sustainably in reusable and biodegradable bottles

Our Partners

How We Get Water From the Sky

1. Air Intake

Atmospheric Water Generators (AWGs) **extract water from humidity** in the air. Moist ambient air is pulled into the unit by fans. A multi-layer filter removes dust, pollen, and other airborne particles.

2. Water Extraction

The air is drawn through a series of condensing coils. Water vapor is cooled down to reach dew point, converting it into droplets. A special patented extraction chamber forces water condensation, and a storage tank collects the extracted water.

3. Water Filtration

The water is purified through a multi-stage filtration system that removes all impurities and pathogens. Water is now completely pure and safe to drink.

Why Skydrops

We make ultra-pure atmospheric alkaline water

Crafted from the sky - with salt-free origins, near-zero carbon emissions & without depleting Qatar's natural resources.

We package it sustainably

In reusable premium glass, aluminum, and 100% biodegradable, plant-based bottles. Eliminate single-use plastics & glass.

We deliver freshly made, bottled water within 48 hours

Then we return weekly to pick up used bottles, sanitize and refill them - meeting your sustainability needs simply & cost-effectively.

Reduce & Reuse

Only 6% of plastics & glass is recycled in Qatar. Skydrops bottles are **refilled hundreds** of times before recycling.

Skydrops Sustainable Water Packaging

Customizable bottles for your brand

Atmospheric Sparkling & Alkaline Water

Premium Glass

330ml/500ml/1.5L

Premium Aluminium

500ml/1.5L

100% Biodegradable, Plant-Based PLA
250ml/500ml

Stainless Steel
5 Gallon

Our water is **made on-demand** for each client - not stored in warehouses or shipped across the world

Be the First to Drink the Sky

Premium alkaline or sparkling drinking water

Salt-free at the source

Crafted from Qatar's sky - not desalinated seawater

Crafted for superior taste

Mineralized for maximum health benefits

Freshly-made within 48 hours of delivery

Not stored in warehouses or shipped across the world

BPA-free premium glass, premium aluminium or 100% biodegradable, plant-based PLA packaging

Clean. Fresh. Ultra-pure.

Premium Alkaline Water in 100% Biodegradable Plant-Based PLA Bottles & Caps

SKYDROPS bottles, caps and labels are made from non-GMO sugar cane and can be ground up and repurposed as:

**Industrial
Compost**

**Nontoxic
Burnable Fuel**

**Filament for
3D Printers**

**Recycled
Resin**

Simply toss it in the compost!

Our PLA bottles biodegrade in 5 months.
A plastic water bottle takes 450 years.
